Luxury Hotel website

Abstract

This project contains a website created with HTML, CSS, BOOTSTRAP, JAVASCRIPT. Luxury Hotel is a hotel website in which you can view hotel rooms, book rooms. It contains a total of 7 pages – home, rooms, blog, blog-single, about, contact, book now. The project is fully functional in every kind of device whether its phone, tablet or desktop.

Home

Home page is the first page of the website which contains the valuable content like links for other pages such as about, services, case study, blog, contact. It contains navbar which directs user to their source and also have many concepts of html like button, links etc. In this project home page will have links to go to booking room page and some layouts of the hotel rooms which customer would like to book into.
